

STREAM PROGRAM

St. Christopher School is transitioning into a STREAM school. STREAM (Science, Technology, Religion, Engineering, Arts, and Math) schools seek to integrate Catholic identity into every aspect of the curriculum while providing a challenging learning environment focused on science, technology, math and the arts. STREAM schools promote a culture of innovation, as well as a commitment to ethical behavior and social justice. STREAM education is another tool to help develop students that are prepared to lead, succeed, and serve, while giving witness to their Catholic faith.
